
Features

Therapy modes: Lateral rotation, static, alternating pressure & pulsation
Immersion automated with weight and height input
3 in 1 alternation for better pressure redistribution
Lateral rotation: 40 degrees left, right or full turn on a timer
Microclimate management with 25 cubic liters per minute air flow
Max inflate for patient care on timer that auto resets to previous pressure settings
Alarm for 'bottom out' and 'power failure'
Quilted comforter - low friction & vapor permeable
Lateral air pillows cushion patient from side rails during lateral rotation
10 digital adjustable comfort control settings
CPR quick release system & air hose jacket
Power cable management so no power cord under the bed

Specifications

Standard Size: 36" x 80" x 10"
500 lb. capacity
Warranty: 1 year parts & labor

Bariatric size: (42", 48") x 80"
1000 lb. capacity
